

Product Specification Sheet

Wireless Keyboard with Built-in Trackball

Part #: AKB1601US

Product Description:

Enjoy wireless freedom via the latest in IR technology with this combined keyboard and mouse. Utilizing a full size qwerty keyboard, the AKB1601 also comes with a built-in trackball mouse incorporating both left and right mouse button keys. With such advanced yet simplified technology you can now easily operate your computer remotely without the need for a separate mouse. Plug your laptop into your LCD TV at home or a large monitor screen and you can control your computer whilst sitting on your sofa without the need for a place to operate your mouse.

Product Features and Specifications:

-  This is a [Targus global product](#)
- Extends the remote distance up to 7.5m. DIP switch inside battery cover allows 16 different IR channels setting to avoid interference.
